

NATIONAL SYMPOSIUM ON K-12 DESIGN EDUCATION
PLANNED IN CONJUNCTION WITH THE AIA NATIONAL CONVENTION

Lessons from the Field: Practice, Programming, and Purpose

Wednesday, June 9, 2004

10:00am-6:00pm

National-Louis University
122 South Michigan Avenue
Chicago, Illinois 60603

A forum for design professionals, AIA component members, architecture foundations, and educators interested in the future of K-12 design education. Join us in Chicago to share best practices among peers, to learn from a sampling of successful recent programs from across the country, and to reflect on the purpose of design education in the K-12 educational landscape.

LESSONS FROM THE FIELD

PRACTICE

How can we elevate the art and craft of teaching children about design?

How can we use design to teach?

PROGRAMMING

How can we make good programs even better?

What are some barriers to implementation and how can we overcome them?

PURPOSE

What role can design education play in the K-12 setting?

If we were to have a common mission within the design education community, what would that be?

BREAK-OUT SESSIONS | LUNCHEON | EVENING RECEPTION
ROUNDTABLE DISCUSSIONS | NEW NATIONAL DIRECTORY OF PROGRAMS
